LATEST WAR NEWS

The French and British troops opposing the invasion of the German army in Belgium have suffered a serious reverse, according to the official announcement 1ssued by the French War Office, In the battle line, which extends from Mons to the Luxemburg frontier, several army corps, composed of both British and French took the offensive on Sunday against the Germans, but their plan of attack failed, owing to the 'unforseen difficulties," as described by the official statement, and the troops retired to the covering positions.

The losses on both sides are reported as extremely heavy, and the French officials describe the Germans as being obliged to establish themselves in fresh positions in Lorgaine.

The French have abandoned those portions of Alsace and Lorraine which they had previously occupied, and now look for heavy fighting in French territory.

Detachments of German cavalry, operating on the extreme right, have reached Roubaix, a This territory is defended only by

Emperor Nicholas of Russia is reported to have gone to the headquarters of the Russian army, which has taken the offensive in full strength and is said to be advancing rapidly in East and West Prussia.

THE FALL OF THE HOUSE OF USHER

EDGAR ALLAN

POE

By Edgar Allan Poe

Twenty-four famous authors were asked recently to name the best short story in the English language. The choice of Gouverneur Morris was "The Fall of the House of Usher," by Edgar Allan Poe, who won world renown as a short story

GOVVERNEUR MORRIS

PART I.

URING the whole of a dull. dark and soundless day in the sutumn of the year, when the ciouds bung oppressively low in the heavens, I had been passing aione on horseback, through a singularly dreary tract of country, and at leagth found myself, as the shades of evening grew on, within view of the melancholy liouse of Usher. I know not how it was, but, with the first glimpse of the building, a sease of in sufferable gloom pervaded my spirit. I looked upon the scene before meupon the more house and the simple landscape teatures of the domain, upon the bleak walls, upon the vacunt eyellke windows, upon a few rank sedges and upon a few white trunks of decayed trees, with an atter depression of soul which I can compare to no earthly sensation more properly than

to the after dream of the reveler upon opium, the bitter lapse into every day life, the hideons dropping of the veil There was an Ichness, a sinking, a sickening of the heart, an unredeemed dreariness of thought which no goading of the amagination could torture into aught of the subilme. i relned my borse to the precipitous brink of a black and sarid tarn that lay in un rnfiled luster by the dwelling and gazed down, but with a shudder even more thrilling than before, upon the remodeled and inverted images of the gray sedge and the ghastly tree stears

and the vacant and eyelike windows.

Nevertheless in this mansion of gloom i now proposed to myself a sojourn of some weeks. Its proprietor. Roderick Usher, had been one of my boon companions in boyhood, but many years had clapsed since our last meetiag. A letter, however, had lately reached me in a distant part of the country-a letter from him-which, in its wlidly importunate nature, had admitted of no other than a personal reply. The manuscript gave evidence of nervous agitation. The writer spoke of acute bodily litness, of a mental disorder which oppressed him and of an earnest desire to see me as his best and, indeed, his only personal friend. with a view of attempting by the cheerfulness of my society some al-

leviation of his malady. Although as boys we had been even intimate associates, yet i really knew little of my friend. His reserve had been always excessive and habitual. I was aware, however, that his very ancient family had been noted, time ont of mind, for a peculiar sensibility of temperament, displaying itself through long ages in many works of exaited art and manifested of late in repeated deeds of munificent yet nuobtrusive charity as well us in a passlonate devotion to the intricacies, perhaps even more than to the orthodox and eustiv recognizable beauties, of musical science. I had learned, too. the very remarkable fact that the stem of the Usher race, all time hoaored as it was, had put forth at no period any enduring branch-in other words, that the entire family lay in the direct line of descent and had atways, with very trifling and very temporary variation, so lain. It was this deficiency, perhaps, of colinteral issue and the consequent undeviating transmission from sire to son of the patrimony with the name which had at iength so identified the two as to merge the original title of the estate in the quaint and equivocal appellation of the "House of Usher"-an appellation which seemed to include in the minds of the peasantry who used it both the family and the mansion.

When I again uplifted my eyes to the house itself from its lurage in the pool there grew in my mind a strange fancy. I had so worked upon my imagination as really to believe that about the whole mansion and domain there hing an atmosphere peculiar to themselves and their immediate vicinity-un atmosphere which had no affinity with the nir of heaven, but which had reeked up from the decayed trees and the gray wall and the silent tarna pestilent and mystic vapor, duil, ainggish, faintly discernible and leaden

Shaking off from my spirit what must have been a dream. I scanned niore narrowly the real aspect of the buliding. Its principal feature seemed to be that of an excessive antiquity. The discoloration of ages had been great. Minute fungi overspread the whole exterior, hanging in a fine tangled webwork from the eaves. Yet ail this was apart from any extraordinary dilapidation. Ferhsps the eye of a serie thizing observer might have discover ed s barely perceptible themre which

extending from the roof of the build ing in front, made its way down the wail in a zigzag direction until It became lost in the sullen waters of the

Noticing these things, i rode over a short causeway to the house. A servant in walting took my horse, and I entered the Gothic archway of the ball. A valet of stellthy step thence conducted are lu silence through many dark and intricate passages in my progress to the studio of his master.

On a staircase I met the physician of the family. His countenance. I thought, wore a mingled expression of low cunning and perplexity. He accosted me with trepldation and passed The valet now threw open a door and ushered me into the presence of his muster.

The room in which i found myself was very large and lofty. The wladows were jong, narrow and pointed and at so vast a distance from the hiack oaken floor as to be altogether inaccessible from within. Feeble gleams of encrimsoned light made their way through the treilised panes and served to render sufficiently distinct the more prominent objects around. I feit that I breathed an atmosphere of sorrow. An air of stern deep and Irredeemable gloom hung over and pervaded nii.

Upon my entrance Usher arose from s sofa on which he had been lying at full length and greeted me with a vivacions warmth which had much in it, i at first thought, of an overdone cordiality-of the constrained effort of the ennuye man of the world. A glance, however, at his countenance conviaced me of bls perfect sincerity. We sat down, and for some moments, while he spoke not, I gazed upon him with a feeling half of pity, buil of awe. Surely man had never before so terribly altered in so brief a period as had Roderick Usher. it was with difficulty that i could bring myself to admit the identity of the one being hefore me with the companion of my early hoyhood. Yet the character of his face had been at all times remarkable. A cadaverousness of complexion; an eve large, ilunid and jumisons be yond comparison; lips somewhat thin and very pailed, but of a surpassingly beautiful curve; s nose of a delicate Hebrew model, but with s breadth of nostril musnul in similar formations; a finely molded chin, speaking in its want of prominence, of n want of moral energy; hair of a more thub weblike softness and tennity-these features, with an inordinate expansion above the regions of the temple. made up altogether a countenance not easily to be forgotten. The now ghast iy pailor of the skia and the now miraculous inster of the eye, above all things, sturtled and even awed me

expression with any idea of simple hu In the manner of my friend i was at once struck with an incoherencean inconsistency, and i soon found this to ariso from a series of feeble and futile struggles to overcome an habitnat trepidancy-an excessive nervous agitation.

The silken hair, too, had been suffered

to grow ull unneeded, and as, in its

wlid gossamer texture, it floated rather

than fell about the face I could not.

even with effort, connect its Arabesque

iiis action was alternutely vivacious and sullen. His voice varied rapidly from a tremulous indecision (when the animul spirits seemed atterly in abeyance) to that species of energetic concision-that abrupt, weighty, unharried and hollow sounding enunciation; that leaden, self balanced and perfectly modulated guttural utterance, which may be observed in the lost drnnkard or the irrecinimable eater of opium. during the periods of his most intense excitement.

It was thus that he spoke of the ohject of my visit, of his earnest desire to see me and of the solace he expected me to afford him. He entered at some length into what he conceived to be the unture of his maiady. it displayed itself in a host of unnatural sensutions. He suffered much from 8 morbid nenteness of the senses; the most insipid food was alone endurable; he could wear only garments of certain texture: the odors of all flowers were oppressive; his eyes were tortured by even a faint light, and there were but peculiar sounds and these from stringed lastruments which did

not inspire him with horror. To an anomalous species of terror found him a bounden slave. "I shall perish," said he. "I must perish in this deplorable folly. Thus, thus, and not otherwise, shall i be lost I drend

except in its absolute effect-in terror. In this unnerved, in this pitiable condition, I feel that the period will sooner or later arrive when I must abandon life and reason together in some struggie with the grim phantasm-fear," I learned, moreover, at intervals

the events of the fature, not in them

seives, but in their results. I shudder

at the thought of any, even the most

trivial incident, which may operate upon this injoierable agitstion of soni.

I have indeed no athorrence of danger

and through broken and equivocai hints, that he was eachained by certain auperstitious impressions in regard to the dweiling which he tenanted and whence, for many years, he had never ventured forth.

He admitted, however, although with hesitation, that much of the pechilar gloom which thus afflicted him could be truced to n more natural and far more pulpable origin, to the severe and long continued illness-ladeed, to the evidently approaching dissolution of s tenderly beloved sister, his sole companion for long years, his last and only relative on earth. "Her decease." he said with a bitterness which I can aever forget. "would leuve him-him the hopeless and the frail-the last of the ancient race of the Ushers." While he spoke the Ludy Madeline-for so she was called, passed slowly through a remote portion of the apartment, and without having noticed my presence. disappeared. I regarded her with an ntter astonishment not unmingled with dread, and yet I found it impossible to account for such feelings. A sensa tion of stupor oppressed me, as my eyes followed her retreating steps.

The disease of the Ludy Madeline had long bulled the skill of her physiciaus. A settled apathy, a gradual wasting away of the person and frequent al though transient affections of a purtiully eataieptical character, were the nunsual diagnoses. fiftherto she had steadly borne up against the pressure of her maindy, and had not betaken herself finally to bed; but, on the clos ing in of the evening of my arrival at the house, she succumbed (as her brother told me at night with inexpressible agitation) to the prostrating power of the destroyer, and i learned that the glimpse i had obtained of her person would thus probably be the last I should obtain-that the lady, ut least while ilving, would be seen by me no

For several days ensuing her name myself, and during this period I was t busied in earnest endeavors to afleviate the melancholy of my friend. We painted and read together, or I listened as if In a dream to the wlid improvizations to his speaking gultar.

I shall ever bear about me a memor; of the many solemn hours I thus spent aione with the master of the house of Hsher. Yet I should full in any attempt to convey an idea of the exact character of the studies or of the occupations in which he involved me or led me the way. An excited and highly distempered identity threw a sulphurous luster over all

One of the phantusmagoric conceptions of my friend, partaking not so rigidiy of the spirit of abstraction, may be shadowed forth, uithough feebly, in words. A small picture presented the Interior of an immensely long and rec' tangular vanit or tunnel, with low terrintion or device. Certain accessory points of the design served well to convey the idea that this excavation. iay at an exceeding depth below the surface of the earth No outlet was observed in any portion of its vast extent, and no torch or other artifichti source of light was discernible. Yet a flood of intense rays rolled throughout and bathed the whole in a glastly and inappropriate spiendor.

The words of bls wild fantasius ifor he not infrequently accompanied him self on the gultar with improvisations were the result of that intense col lectedness and concentration to which have previously altuded as observable only in particular moments of the highest artificial excitement. The words of one of these rhapsodies 1 have easily renembered. I was per haps the more forelbly impressed with It as he gave It, because in the under or mystle current of its menning I fan eled that a perceived, and for the first time, a full consciousness on the part of Psher of the fottering of his lofty reason man car throne. The verses which the entirted "The tianuted Painter to core nearly if not accu-

a crome valleys The control entertained in the control of the control of the polace-Red in the convenied its head name of the interest and animal of It stored to a Over table built so fide

and all with pearl and ruby glowing Was the fsir palace door, Phrough which came flowing, flowing, flowing And sparkling everynore

troop of Echoes, whose sweet duly Was but to sing n voices of surpassing beauty The wil and wisdom of their king

But evil things in robes of sorrow Assailed the monarch's high estate Ah, let us mourn, for never morrow Shall dawn upon him, desotatel), And round about his nome the glory That blushed and bloomed Is but a dim remembered story Of the old time entombed.

And travelers now within that valley
Through the red litten windows see
Vast forms that move fantastically
To a discordant melody,
While, like a rapid sheatly river, Through the pale door

A hideous throng rush out forever

And laugh, but smile no more I well remember that suggestions arising from this ballad ied us Into a train of thought wherein there became manifest an oplulon of Usher'a, which I mention not so much on account of its novelty (for other men have thought thas) as on account of the pertinacity with which he maintained it. This opinion, in its general form, was that of the sentience of ail vegetable things. I lack words to express the full extent or the earnest abandon of his persussion. The belief, however, was connected (as I have previously blated) with the gray stones of the home of his forefathers. The conditions of the sentlence had been here, he imagined, fulfilled in the method of coliocation of these stones. Its evidence -the evidence of the sentience-was to be seen, he said (and I here start ed as he spoke), in the gradual yet certain coadensation of an atmosphere of their own about the waters and the wails. The result was discoverable, he added, in that slient yet importanate and terribie influence which for centuries had moided the destinies of his family and which msde him what I now saw him-what he was. Such opinions need no comment, and I will make none.

PART II. NE evening, baving informed me abruptly thut the Lady Madeline was no more, he stated his intention of preserving her corpse for a fortnight, previously to its final interment, in one of the numerous vauits within the maia wails of the hullding. The brother had been led to his resolution (so he told me) by consideration of the unusual character of the malady of the deceased, of certain obtrusive and eager inquiries on the part of her medicai man and of the remote and exposed situation of the burial ground of the family. I will not deny that when i called to mind the sinister countenance of the person whom I met upon the was unmentioned by either Usher or staircase on the day of my arrival at the house I had no desire to oppose what t regurded as, at best, but a harmiess and by no means an unnatural precaution.

At the request of Usher, I personally alded him in the arrangements for the temporary entombment. The body having been encottined, we two alone bore it to its rest. The vanit in which we placed it was small, damp and entirely without means of admission for light, lying ut great depth immedintely beneath that portion of the huilding in which was my own sleeping apartment. It had been used upparently in remote fendal times for the worst purposes of a donjou keep and in later days as a place of deposit for powder or some other highly com bustible substance, as a portion of its floor and the whole interior of a long archway through which we reached it were carefully sheated with copper wails, smooth, white and without in . The door, of massive iron, had been also similarly protected. Its immense weight caused an unusually sharp gruting sound as it moved upon Its hinges.

> Having deposited our mournful hur den upon tresties within this region of Borror, we purtially turned aside the yet miscrewed lid of the coffin and looked upon the face of the tenant. A striking similitude between the brother and sister now first arrested my attention, and Usher, divining perhaps my thoughts, murmired out some few words, from which I learned that the deceased and himself had been twins and that sympathies of a scarcely lutelligible nature had always existed between them. Our glances rested not long upon the dead, for we could not regard her unawed. There was I faint blush upon the bosom and the face, with that suspicionsly lingering smile upon the lip which is so terrible lulentli. We repliced and screwed down the lid and secured the door of Iron.

> And now, some days of hitter grief having eiapsed, an ofservable change came over the features of the mental disorder of my friend. His ordinary manner had vanished. His ordinary occupations were neglected or forgotten. ile roamed from chamber to chamber with hurrled, nnequal and objectiess step. The pullor of his countenance had assumed if possible a more ghastly bue, but the luminousness of his eye had atterly gone out. The once occasional huskiness of his tone was heard no more, and a tremuions quaver, as if of extreme terror. habitnally characterized his atterance. I felt creeping upon me by slow yet certain degrees the wild influences of his own fantastic yet impressive superstilions.

> It was especially upon retiring to bed lite in the uight of the seventh or eighth day after the placing of the Lady Mudeline within the donjon that experienced the full power of such feelings. Sleep came not nest my couch, while the hours wanted and waned away. I struggled to reason off the nervousness which had dominior over me. I endeavored to believe that much, if not all of what I felt, was due to the bewlidering influence of the gloomy furuiture of the room-of the dark and tattered draperies which for tured lulo motion by the breath of : rising tempest, swayed fitfully to and fro upon the waits and rustled oneas lly ation the decorations of the bed But my efforts were fruitiess. An itrepressible tremor gradually pervaded my frame, and at length there sat apor

my very heart an incubna of utterly canciess aiarm. Shuking this off with a gasp and a struggle I uplifted myself for there could be no doubt whatever upon the pillows, and, peering earnest- that in this instance I did actusity iy within the intense darkness of the hear, aithough from what direction it chamber, hearkened-I know not why, proceeded i found it impossible to say, except that an instinctive spirit prompted me-to certain low and indefinite harsh, protracted and most unusual sounds which came through the pauses of the storm at long latervals, I knew not whence. Overpowered by an intense sentiment of horror, unaccountable yet unendurable, I threw on my clothes with basic, for I felt that night, and endesvored to arouse myseif from the pitiable condition into which I had fallen by pacing rspidiy to and fro through the apartment.

I had taken but few turas in this manaer when a light step oa an adjoining staircase arrested my attention. presently recognized it as that of Usher. In sn instant afterward he rapped with a geatle touch at my door and entered, bearing a lamp. His countenance was, as usuai, cadaverously wsn; bat, moreover, there was a species of mad blinrity in his eyes, sn evideatly restrained hysteris in his whole demeanor. Itis air appailed me, but anything was preferable to the soiltude which I had so long endured.

"And you have not seen it?" be said abruptly sfter having stared about him for some moments in silence-"you have not then seen it? But stay! You Tims speaking and baving carefully simded his lamp, he harried to one of the casemeats and threw It freely open to the storm.

The impetuous fury of the entering gust nearly lifted us from our feet. It waa, indeed, a tempestnous yet sterniy besutifui night, and one wildly aluguiar in its terror and its beauty. A whiriwind had apparently collected its the way before him and approached. force in our viciuity, for there were valoronsly over the silver pavement of frequent and violent alterations in the the castle to where the shield was direction of the wind, and the exceeding density of the clouds (wbich hung so low- as to press upon the turrets of the house) dld not prevent our percelving the lifelike velocity with which they flew careering from all points against each other, without passing away into the distance. i say that even their exceeding density did not prevent our percelving this. Yet we had no gilmpse of the moon or stars nor was there any flashing forth of the lightning. But the under surfsces of the huge masses of agitated vapor, as weii as ail terrestriai objects immediately around us, were glowing in the unnatural light of a faintly luminous and distinctly visible gaseons exhaistion which enshrouded the mansion.

"You must not-you shall not behold this!" said i shudderingly to Usher as i led him, with a gentie violence, from the window to a seat. "These appearances which bewilder you are merely electrical phenomena not uncommon. or it may be that they have their ghastly origin in the rank miasma of the tarn. Let us close this ensement. The air is chilling and dangerous to vonr frame. Here is one of your favorite romances. I will read, and you shail listen, and so we will pass away this terrible night together."

The antique voinme which I had taken up was the "Mad Trist" of Sir Launceiot Canning, but I had called it a favorite of Usher's more in sad jest than in earnest, for, in truth. there is little in its uncouth and unimaginative prolixity which could have had interest for the lofty and spiritnal ideality of my friend. it was, however. the only book immediately at hand.

I had arrived at that weil known portion of the story where Ethelred. the hero of the trist, having sought in vain for peuceable udmission into the dwelling of the hermit, proceeds to make good an entrance by force. Here, it will be remembered, the words of the narrative run thus:

"And Ethelred, who was hy nature of a doughty heart and who was now mighty withai on account of the powerfulness of the wine which he had drunken, walted no longer to parley with the hermit, who, in aooth, was of an obstinute and mailceful turn, but, feeling the rain upon his shoulders and fearing the rising of the tempest, uplifted his mace ontright and with blows made quickly room in the plankings of the door for his ganntleted hand, and now, pulling therewith sturdily, he so cracked and ripped and tore all asnader that the noise of the dry and hollow sounding wood nlarnmmed and reverberated throughout the forest."

At the termination of this sentence atarted, and for a moment paused. for it appeared to me caltbough i at once concluded that my excited fancy had deceived mer that from some very remote portion or the mansion there came indistinctly to my ears what might have been in its exact similar ity of character, the echo dut a stifled and duil one certainly) of the very erneklug and ripping sound which Sh Lanneelot had so particularly describ ed. i continued the story:

"But the good champion Ethelred now entering within the door, was sore enraged and amazed to perceive no signal of the muliceful bermit; but, in the stend thereof, a dragon of a sculy and prodigious dementor, and of a flery tongue, which sate in guard before a palace of gold, with a floor of silver, and upon the wall there hang shield of shining brass with this legend enwritten:

Who emereth herein a conqueror hati Who slayeth the dragon, the shield he shall whi.

And Etheired uplifted his mace and struck upon the head of the dragon. which felt before him and gave up his wity bresth, with a shrick so borrid and hatsit and withat so plereing that Ethelred had fain to close his ears with his hands against the dreadful noise of it, the like whereof was never before heard."

Here again I paused abaultly, and ow with a feeling of wild amszement. a low and apparently distant, but screaming or grating sound-the exact counterpart of what my funcy had atready conjured up for the drugon's unnatural shriek.

Oppressed, as I certainly was, upon the occurrence of this aecond and most i should sleep no more during the extraordinary coincidence by a thonanad conflicting sensations, in which wonder and extreme terror were predominant, i atill retained sufficient presence of mind to avoid exciting by any observation the sensitive aervonsness of my companion. I was by no means certain that he had noticed the sounds in question, aithough assuredly a straage afteration had during the last few minutes taken place in his demensor. From a position fronting my own he had gradually brought around his chair so as to sit with his face to the door of the chamber, and thus I could but partially perceive hisfeathres, although i saw that his lips trembled, as if he were murmuring inandibly. His head had dropped upon his brenat, yet i knew that he was not asieep from the wide and rigid opening of the eye as I caught a glauce of it in profile. The motion of his body. too, was at variance with this idea; for he rocked from side to side with a gentle yet constant and uniform sway. resumed the narrative:

"Aud now the champion, having es caped from the terrible fury of the dragoa, bethinking himself of the brazen shield and of the breaking up of the enchantment which was upon it, removed the carcass from out of upon the wail, which is sooth tarried. not for his full coming, but fell down at his feet upon the silver floor with a mighty great and terrible ringing sound.

No sooner had these syliables passed my lips than, as if a shield of brass had indeed at the moment fallen heavily upon a floor of sliver, I became aware of a distinct, hollow, metaliic and claagorous yet apparently muffled. reverberation. Completely unnerved, E leaped to my feet, but the measured. rocking anovement of Usher was undisturbed. I rushed to the chair in which he sat. His eyes were beat fixedly before him and throughout his whole countenance there reigned a stony rigidity. But as I placed niv hand upon his shoulder there came a strong shudder over his whole person. a sickly smile quivered about his lips. and I saw that he spoke a low, hurried and glbbering naurmur, as if unconscious of my presence. Bending ciosely over him, I at length drank in the hideous import of his words.

"Not hear It? Yes, I hear it and have heard it. Long, long, long, many minutes, many hours, many days bave i heard it, yet I dared not-oh, pity me, miserable wretch that i am-I dared not-dared not speak. We have put her living la the tomb! Sald I not that my senses were acute? I now tell you that I heard her first feeble movement in the hollow coffin. I heard them-muny, many days ago-yet i dared not-I dured not speuk! And now, tonight, Ethelred-ha, ha!-the breaking of the hermit's door and the death cry of the dragon and the clangor of the shield-say, rather, the rending of her coffin-and the grating of the Iron hinges of her prisou and her struggies within the eoppered archway of the vault! On, whither shall I fly! Will she aot be here anon? Is she not hnrrying to upbraid me for my baste? Have I aot heard her footstep on the stair? Do I not diatinguish that heavy and horrible beating of her heart? Madman!"-here he sprang furiously to his feet and shricked out bia syllables as if in the effort he were giving np his aoui-"Madmun! I tell you that she now stands without the door,"

As if in the superhuman energy of his utterance there had been found the potency of a spell, the huge antique panels to which the speaker pointed threw slowly back upon the instaut their pouderous and ebony Jaws. It was the work of the rushing gust. But, then, without those doors there did atand the lofty and enshrouded figure of the Lady Madeline of Usher. There was blood upon her white ropes and the evidence of some bitter struggle upon every portion of her omacinted frame. For a moment she remained trembling and reeling to and froupon the threshold; then, with a low, moaning cry, fell heavily inward upon the person of her brother and, in her violent and now final death agonies. bore him to the floor a corpse and a victim to the terrors he bad antici-

From that chamber and from that mansion I fied aghast. The storm was atili abroad in all its wrath as i found myself crossing the old causeway. Suddenly there shot along the path a wild light, and I turned to see whence a gleam so unusuai could have issued. for the vast house and its abadows were alone behind me. The radiauce was that of the full, setting and blood red moon, which now shone vividly through that once barely discernible assure of which I have before spoken as extending from the roof of the building in a zigzag direction to the base. While i gazed this fissure rapidly widened, there came a fierce breath of the whiriwind, the entire orb of the satellite burst at once upon my sight. my brain recied as I saw the mighty walls rushing asunder, there was a long, tunnituous shouting sound like the voice of a thousand waters, and the deep and dank tarn at my feet closed sullenly and siteatly over thefragmeats of the "House of Paher"

ACETYLENE GAS.

of Caloium, Which Produces

The immense production at Niagara falls of carbide of calcium, the curious artificial stone which when hathed in water gives off acetylene gas, recalls that this substance was first manufactured in America by accident through the metallurgical operations of T. L. Wilson, near a small stream ia North Carollas.

While using limestone and salt in melting he noticed among the melted slag which day hy day ran nearer to the hrink of the little stream a grayish-white substance new in his experience, but thought little of it until one day the molten slag overhung the wasuddealy a hright white flame hurst out of the molten mass and enveloped

He drew from the dry slag some of the strange material and touched a match to it, but without result. Then he poured some water upon it, and at the next trial the liberated acetylene

gas broke lato flame. Thus in 1892 accident discovered a practicable way of producing that acetylene gas first discovered in Engiand ia 1836 by Edmund Day while and charcoal. It remained, however, for the intense heat of the hydroelectrical furnaces of Niagara to turn out this wonderful stone in aimost perfect purity and immense quantities.-National Magaziae.

GUARDING THE DIAMONDS.

Thousands of Miles of Barbed Wire Inclose Kimberley's Mines.

Machiaery and barbed wire have supplanted the rude methods of hreaking up diamond hearing blue earth and protecting the valuable finds employed twenty years ago ia the South African diamond mines.

The depths of the strange, crater shaped hole in which the peculiar diamoad bearing earth is confined are now penetrated by shafts, reaching huadreds of feet down into the earth. with forty foot levels. The hroken earth is removed in closed trucks to the surface, where, after a season of exposure to sun and atmosphere strewn on the ground, it is hauled to the mills. Here pulsators finally locate the dlamonds on grease covered inclined ta hles, to which the diamonds adhere, while loose sand, earth and gravel are washed away hy water.

Acres of ground covered by broken earth brought up from the mines contaia possibly millions of dollars' worth of gems, and these treasure troves are protected by high fences of barbed wire, with intricate arrangements at the corners and at the gates. About 4,000 miles of wire are used in the defeases about the Kimberley miaes .-New York Press.

Plane Trees of Cannosa.

Not least among trees which have become celebrated are two glant plane trees at Caanosa, near Ragusa, that 'peari of the Adriatic." Within three hours' walk of Ragusa, on an elevation ahove the tideless sea, lies the famous garden of Count Gozze. From a primltive landing place a path leads up betles and oleanders to the level spot where the two colossal trees have stood from thae lumemorial. The effect of the larger tree upon a spectator standing beneath it is positively overwhelming. it takes twenty-five paces merely to walk closely round the truak, while the spreading branches reach horizontally for from thirty to forty paces and then bend upward and fork. A good sized public meeting could be held in the shade of either of these lmmense trees.-Wide World Magazine.

Got Away From the Odd One. A curious story comes from the people of the Niger. A very rich man dled, leaving the vast fortune (for NI gerla) of 20,001 cowrles. it fell to the lot of the king to divide them among three sons, and he was at his wits' end to know what to do with the one cowrie. A wizard was called in, who gained boundless credit by doling out the cowries one by one until only six remained. These he divided into three lots of two each and gave a lot to each son The king to this day attributes this very satisfactory outcome to conjuring.-Independent.

Food of the Chicksdee.

The food of the chickadee is made up of insects and vegetable matter in the proportion of seven of the former to three of the latter. Moths and caterplilars are favorites and form about one-third of its food, while beetles, ants, wasps, bugs, grasshoppers and spiders make up the rest. The vegetable food consumed is composed of seeds, largely those of plae, polsoa ivy and weeds.

Sky Effects. "This scenery isn't what it was," complained the artist.

DEMOCRATIC TICKET

For United States Senator J. C. W. BECKHAM

For United States Senator Unexpired Term JOHNSON N. CAMDEN

> For Congress W. J. FIELDS

Entitled to Support.

The majority for Governor Beckham was approximately seven thousand. To be exact, it was six thousand eight hundred and six. He carried eight out of the eleven districts. His vote was scattered over the entire state and came from all classes and conditions. He carried eighty-five out of one hundred and twenty counties of the state, and the only large city that gave him a majority was the city of Paducah. He is entitled the vote of every person who participated in the primary, and the rest of the Democrats who did not get there.

Senator Camden, who is serving a short term by appointment, was so clearly the majority choice of the Democratic voters that he won his race without even making a canvass and without one voter in a hundred knowing him, He is compelled under the law to make the race before the people, and there ought not to be any question about his majority. A very nice little man by the name of Bullitt is the Republican nominee against him. Don't forgt the name, and be sure to vote for Camden.—Bowling Green Mssen-

Model Highways.

The re-construction of the Mt. Sterling & Maysville turnpike has proven conclusively to our citizens that model highways, such as we all want, cost money-real money and lots of it-and as said by Mr. Z. D. Dunlap, Assistant Director General of the National Highways Association, at our recent good roads meeting, "enthusiasm and conversation wil1 not build roads." What we need is a bond issue and we will never have good roads until we provide the funds with which to pay for them and then see that the same is honestly spent.

Gov. Beckham is entitled to the active support and assistance of every Democrat in Kentucky and so far as this section goes we have vet to hear of a Democrat who \$2.45 Broken sizes in Womvet to hear of a Democrat who yet to hear of a Democrat who will not cheerfully aid in making his majority what the country has a right to expect of eKnntucky Democrats.-Franklin Favorite.

The fight among Democrats is now over. Let us not discuss that any longer, but let us turn or telephone us your order, you'll to the main issue—the November get the best on the market either election-that's what needs our attention now .- Owensboro Enquirer.

We must not forget in all this excitement that we have a United S'ates Senator and eleven Congressmen to elect in Kentucky on November 3.-Owensboro Messenger.

Paradise is the place where people are not constantly demanding why this and that city ordinance is not enforced.

WRESTLING MATCH

Gus Kuvaris, famous Greek wrestler, who is booked to meet lack Stone at the Tabb Opera House tonight at 8:15 o'clock, arrived in Mt. Sterling last night and announced himself as being ready to battle for his life and, incidentally, for his wrestling laurels. Kuvaris is as brown as a berry and looks fitter than ever before in his wonderful career. Mt. Sterling fans are to see a real wrestling match tonight and neither men would claim yestera quick victory.

"I just came from Virginia, said Kuvaris to a report last night, "where I have been most of the summer, wrestling and resting between matches. have never met Stone but once, I know he is a big, tough man and I shall have to 'go some' to cop him two falls. That I am confident I can turn the trick is proven by the trip to Mt. Sterling to meet him. You don't suppose I would travel 500 miles to meet him if I didn't think I could beat him, do you?" asked the Greek champion, his eyes winkling.

Stone, the "Silent Swede," when asked last night what he thought of the contest tonight said "I'll win. I don't know how long it will take me to beat Kuvaris, whom I hold in highest esteem, but I feel sure I can beat him two falls in an hour. He is a tough fellow."

When one wrestler says that another is a "tough fellow," he has paid him the highest compliment he is capable of.

A crack preliminary match will be staged between Jack Haly. of Lexington, and Harvey Willoughby, of this city. Haley is one of the best lightweight wrestlers in the South and the match should be a good one.

BEGGING FOR FOOD

A situation that commands atthink that she will be able to re- tention from every portion of the United States is shown in the following special from New York:

Every ship that sails out of New York for English ports these days sails light, though England is begging for food.

The liner Celtic left yesterday Memorial services in honor of with 5,000 tons of foodstuffs in 4,500 and room for 8,000 more. The Adriatic, St. Paul, New York, Philadelphia and others o the thirteen ships of the International Merchantile Marine which have departed for England since the war started have ridden high in the water because of their lightness of cargo. Other lines tell the same story.

Parodoxially, the storage warehouses in and around New York are choked with supplies for which England is offering fancy

The reason why none of this food is going to England, officials of the transatlantic lines assert, is because American shippers have no assurances that their The dogs of war are barking drafts will be honored in England receive payment for their goods.

Tons and tons of merchandise, these officials say, are held in I am writing hail insurance for check against the time when arthree different companies, Come rangements will be made to enin gold for American supplies.

Although in need of foodstuffs generally, for the movement. Of the 43 suits filed for the England is well supplied with grain, almost oversupplied. acery Couunty Circuit Court, 15 are cording to estimates made by officials of the International Merchantile Marine. This, they say, is due to diversion to British ports of large cargoes in bottoms per at the Levee school August bound for continental ports at quently but little grain is going single shipment recently being 2,200 tons on the Kroonland.

Sugar is the one article which Great Britian needs more than any other. For the first time in years English merchants are importing direct from New York. agons of purity when they find The bulk of England's sugar came, before the war, from Germany and Central Europe.

JOB PRINTING OUR SPECIALTY ACT'-Baltimore American.

A LESSON IN GEOGRAPHY.

America's West Coast is? In his book, the "Conquest of the Tropics," Frederick Upham Adams calls attention to some .lttle known geographical facts:

Most of us picture Havana as nearly bouth of New York, when in fact it is about south of Detroit. A study of a map of the new world discloses the disconcerting fact that all of the west coast of South America is east of Detroit, and that most of it is bundreds is of miles east of New York city. The truth of the matter is that we should call that continent "Southeast Amer

I also made the astounding discov ery that a considerable portion of South America lies north of the south ta, Colombia, we do not head south or southeast, we point our prow northport), is twenty odd miles west of Panama City, which is on the Pacific and window of the Tivoii hotel, in Panama City, and watch the sun rise squarely out of the Pacific ocean! Of course an accurate map justifies the aun in selecting the Pacific for rising rather than setting purposes, but it aever seemed right or proper to me. Oceans should stay where they beloag, and the Pacific has no business to twist itself to the cast of Panuma.

TRAVEL IN SAN SALVADOR.

Crossing Rivers and Swamps Tourists Often Get Free Baths.

More than once, says Joha H. Weeks fourney a strong krooboy a part of whose duty it was to earry me over the many streams and swamps that crossed the path. His name was a remarkable one. I do not know how he came by it. but the first time I met him i asked him his name, and he repited in krooboy English, "My uame massa, be Napoleon Bounparte.'

Sometimes Napoleon would have me on his shoulders in the middle of a river, and feeling the rush of water against his legs he would begin to qunke and sny: "Massa, i no fit for

carry you. I go let you fail." i would reply, "Napoleon, I fit for give you one cupful of rice suppose you ao drop me.

He would then take a few more care ful paces, and feeling the swirl of wa ter more strongly about his legs and the stones slipping beneath his feet he would aervously call out lu his curious English: "Massa, massa, I no fit!

bound for let you fall." Napoleon often received from me the promise of two or three cupfuls of rice to steady him before he landed me high and dry upon the farther bank. At times we were not so fortu Then both of us went down into the water, and we congratulated our a austy, muddy swamp.

A mid-eighteenth century traveler,

who is the first person known to have made English of the word "shampoo," wrote that "shampooing Is an operation not known in Europe and is peculiar to the Chinese, which I had oace the curiosity to go through and for which i paid but a trifle. However. had I not seen several Chinese merchants shampooed before me I should bave been apprehensive of danger. even at the sight of all the different instruments." The original "shampoo," as this traveler's detailed account nad other allusions for long after his time show, was very much what we call "massage" aow. it was from india that the word really came, and it represents the imperative of a verb meaning to knead.

Green Animals a Puzzle.

What makes some animals green? If ny reader knows and will tell he will settle a big dispute now going on among scientists who have vowed to find out. Green colorations belong chiefly to insects, worms and reptiles. Whether they get their green bue from the plants they eat or not is a question that has not been conclusively settled, although it has been shown that they will retain their color even whea denied all green food.-Exchange.

Giraffe Meat.

The flesh of young giraffe, especially that of a young cow, is extremely good, somewhat like veni, with a gamelike flavor. The tongue, from eighteen to twenty laches long, is also very good. But the marrow bones afford the greatest luxury to the South Afri-

Woman's Aim.

A bullet shot upward from the earth goes up to aphellon with a retarding or decreasing motion, but a builet fired by a woman at a burgiar will turn a street corner and hit an innocent pedestrian in the leg nine times out of ten.-Florida Times-Union.

While it is earnestly to be hop-in the western part of the State. the Weather Bureau show that ter than spring sown oats, as they bail was allowed. dry years are just as liable to be followed by dry years as by more favorable conditions. In other words, nature does not compensate for a dry year by a wet one. This has been pretty well illustrated right here in Kentucky.

Although corn will undoubtedly always remain the most important feed crop of the State, the repeated failures in recent years show that it is a mistake to depend upon it so absolutely, as has been the case in the past. selves when it was a stream and not There are other crops not affected by summer drouths that can be grown in Kentucky and prove profitable feeding crops. One

such a crop is winter barley. Winter barley is a practically sure crop in Kentucky if sown reasonably early. It will make a yield of from 30 to 60 bushels per acre on good farm land and in feeding value it is about the equal of corn pound for pound. In fact it more nearly approaches corn in composition than any other of our cereals. Winter barley matures about the first of June in the central part of Kentucky, and is available for teed the earliest of all grain crops. Winter barley furnishes excellent fall pasture and can be pastured considerably in the spring and

Turf oats is another fall sown actorily in Kentucky, especially

IDOLS OF THE ANCIENTS.

That Gave Their Names to the Days of the Week.

In the museum at Herita there are representations of the Idols from which the names of the days of the veek are derived

From the idol of the sun comes Sun-This idol is represented with his face like the sun, holding a burning wheel with both hands on his hreast, signifying his course round the world.

The idol of the moon, from which comes Monday, is habited in a short coat, like a man, holding the moon in

Tuisco, from which comes Tuesday, was one of the most suclent and popular gods of the Germans and is represented in his garments of skins, according to their peculiar manner of clothing. The third day of the week was dedicated to his worship.

Woden, from which comes Wednesday, was a vallant prince among the Saxons. His image was prayed to for victory.

Thor, whence comes Thursday, is seated in a hed, with twelve stars over his head, holding a scepter in his

Friya, whence we have Friday, is

represented with a drawn sword in his right hand and a bow in his left. Saeter, from which comes Saturday, has the appearance of perfect wretchedness; he is thin visaged, long haired. with a long beard. He carries a water pail in his right hand, wherein are

READY FOR A WRECK.

Careful Man Who Believed in Taking Every Precaution.

Two friends boarded a great transatlantic liner and set sail for Cherbourg. One was a good fellow. The other was a niggardly man. The first night out they went to their state-

"Say, Bob," said the niggardly man, 'I wish you'd step out on deck while undress.

"That's a remarkable request," objected the good fellow. "Why have you developed this streak of hashfulness at this late day? I never saw any signs of it before."

"Never mind about that," said the niggardly man. "You get out!"

After a long and acrimonlous argument the good fellow went out on deck and stayed half an hour. When he returned to the stateroom the niggardly man was stretched out in the upper berth. Moreover, he was dressed up like a Christmas tree in a berlbboned nightgown and a woman's bou-

"Say," exclaimed the good fellow, what in thunder is the matter? Why have you got that makeup on?"

"Look at me and be wise," said the niggardly man. "Remember the rule In case of a wreck women and chiliren first." -- Popular Magazine.

Peru the Source of Cocaine.

There is a shrub in high Peru which loes not bring the blessing of the potato-I mean the cocoa tree, whence comes cocaine. The leaf is chewed by young and old. Some doctors say it is very had for the people of Peru. The Infantile death rate is high, and they say few old persons are to be found. ls very good for the peasants. I am inclined to take a view between the two opinions. i met a man in Cuzco who was running a grocery store, and Professor Glessecke fold me they had very good proofs in that town that he was a hundred and tifty years old. He sold me chocolate and also cocon enves. I chewed the leaves to try to cure an ulcer in my stomach, and they helped me more than all the medicines of civilization that I had tried.-Peter MacQueen in National Magazine.

The Dream Lion. A Vienna professor is credited with saying that dreams are usually wish Muyhe so. What about int childish dream in which the fero lous ilon comes hounding along be hind you, and you run as how never au before, and the ilon closes the gap lttle by little, and then, all of a sud den, your legs grow limp and your innscies turn to water and your feet fray out and the llon leaps and you awake with a yell if your voice isn't paratyzed, and everybody in the house wakes with you? -- Cleveland Plain

The "Antique" Craze.

Those of us who can afford it steat and horrow and beg the arms, the dress, the emotions of Greece and Too often we hang their rot ting trophies upon our walls, ignorant of their origin, unacquainted with their meaning and not even sympathetic with the emotions that produced them bent only upon the paitry respectability that their presence argues.—World's

Noah Identified.

"Why do you sign your name Norah?" asked a teacher of one of the Chinese boys in his class. "Don't you mow that Norah is a girl'a name?" "Oh, no," was the reply. "Norah is he name of the famous American who outit the ark."-Youth's Companion.

A Safe Proposition.

I lay it down as a safe proposition that the fellow who every little while has to break into the haby's bank for car fare isn't going to evolve into a Baron Rothschild.-Philip D. Armour

Historical Sayings. Tencher-What were Webster's last words? Pupil - i don't remember. na'am, but they all began with Z .-Philiadelphia Ledger.

FACT

Local Evidence.

Evidence that can be verified Fact is what we want. Opinion is not enough.

Opinions differ. Here's a Mt. Sterling fact.

You can test it.

"I have been a hard worker all my life and never once considered that to overdo would one day bring on kidney trouble," says John Forman, of 8 Montgomery street, Mt. Sterdays with my back and began looking around for a cure. I did not find anything that would help me until I got Doan's Kideny Pills at Duerson's Drug Store. They soon made me feel

KENTUCKY CROP REPORT

The crop report as of August est is the most discouraging one that has been issued from this department for many seasons. The report issued last month, while dismal in many prospects, had a hopeful undertone, as seasonable rains could then have saved the crops more or less. There has not been a general rain in the last month. Insufficient showers have fallen in different localities and conditions have deteriorated in practiaclly every ling, "I was laid up for several portion of the State. It is now too late for the rains to do early corn any good whatever. The corn that was planted after June 1st would be materially aided by a good rainfall. Tobacco will come out with anything like a good rain, and the damage has not been so serious to the tobacco crop as to the corn crop. Pastures have dried up and stock water is very scarce in many places. The lack of good drinking water has seemed to injure stock more than the lack of Corn has dropped from a con-

dition of 81 per cent, to 65 per The American mule seems cent. Burley tobacco from 65 per 65 per cent. Cow peas and soy crops. Again we would like to call attention to the possibilities of these two legumes, and the farmer who has sowed a few acres of either of these plants in all probability will have hay for the winter, as we'l as improving his land. Fruits are dropping of the trees on account of the drought conditions. The condition of apples is given at 62 per is doing well. Garden conditions the properties of the corporation.

Great care should be exercised to prevent fires spreading in the fields. The forests are becoming not likely to seriously affect the dry enough for fire to spread mule-growing industry. Ken rapidly if once lighted. The water supply of several towns has the most saleble of her live-become so low that the health authorities are warning the farmers as well as the city dweller of the danger of using water from stagnant wells or pools or from low springs. Two dry seasons in succession have rendered conditions very unpromising from an agricultural standpoint in Kentucky, and just at the time when prices are highest for live stock known in many years, the Kentucky farmer is unable to keep his farm well stocked on account of the drought conditions. He, however, will be well repaid who manages to hold on to his breeding stock under these conditions.

> Very truly yours, J. W. NEWMAN, Commissioner of Agriculture.

HOW TO DANCE THE HESITATION

By ODGERS T. GURNEE Illustrated With Specially Posed Photographs

first introduced into this country it was taken up by line. every one with a great deal of enthusiasm; but, unfortunately, the atepa were changed about ao in different iocalities that few people were able to dance it together without first prac-

Now, however, the steps have been simplified a great deal and are fairly well standardized

Such names as "the flirtation," "the wave" and "the twinkie" are fairly common wherever dancing is popular. However, an accepted method of executing these steps will aid greatly in learning them.

The twinkle suggests stars, but real ly refers to twinking feet. It is danced from the open formation of the tango-that is, side hy side, facing in the same direction, with arms extended in front. The step is founded on the principle of "two steps forward, one step back," but has been modified as follows:

Step forward on the right foot, then forward on the left, rock back on the right and bring the left back beside it. As the right foot comes back move the right forward again quickly. The step can be continued, starting on aiternate feet. Be careful in this step, as in all waitz measures, to keep in time with the music and not jerk or pail too much.

The wave is a very pretty step, but is hardly suited to use on a crowded floor. It is danced from the straight position and requires greater freedom and more space between the partners than do other steps.

The man crosses his right foot over in front of his left, turning slightly to the icft. This first step must be a long one, and is followed by 1wo ahorter steps. The girl does just the same, only going backward. This carries them about three feet to the doing this step.

On the turn the partners should look in the present age.

HEN the hesitation waitz was linto each other's faces, being careful not to bend the head too far out of

> The same duck msy also be danced to waits time very effectively. It is done as in the one step, with a slightly lower dip.

The history of the waitz shows it to have had a very checkered career. In

The Innovation-Hesitation Waltz

of the prettiest and most graceful methods of dancing the waitz, but is very difficult on a crowded floor, as it is impossible to lead the girl out of the way of the other dancers, and the occasional bumps throw one out of step and spoil the whole effect of the dance. The same steps are used as in the ordinary hesitation, the only difference being that the partners do not touch each other at all. To do the best work in this remember to keep as erect as possible throughout and never get more

than a foot away from your partner.
